**INTRODUCTION**

The Project Management Institute's Project Management Professional (PMP) credential is recognized as the universal standard of the profession. In this course, you gain skills to help you prepare for the PMP exam. Through practice exams, workshops, you learn essential PMBOK Guide terminology, tools and techniques. This course is not only about the PMP exam but as an added benefit you will also get a taste of ISO 10006 standard and you will learn how to practically merge the positive aspects of both these guidelines to gain an edge over your competitors.

**BENEFITS**

Prepare to pass the PMP exam. Navigate the process groups and knowledge areas of the PMBOK Guide. Identify and map the inputs and outputs of the PMBOK Guide processes. Align your project management knowledge with PMBOK 5th Edition Guide terminology and definitions. Map the process groups of PMBOK and ISO 10006. Blend the two international guidelines (PMBOK and ISO 10006) to create value for your organization.

**YOU WILL LEARN HOW TO**

- Defining clear project goals and measurable deliverables
- Brainstorming the work breakdown structure
- Estimating task duration and work
- Determining task dependencies and schedules
- Assigning and optimizing resources
