# Certified Project Management Professional

## Introduction

This Project Management Professional diploma / Certified Project Management Professional certification are based on Project Management Institute's (PMI) body of knowledge recognized world wide. This course focuses on providing the participants with requisite knowledge besides building their competence & skills for managing the practical projects and also helping them to prepare for the PMI certification (PMP) exam. The participants also learn ISO 10006 and essential PMBOK Guide terminology, tools and techniques through exercises conducted during the course, which may facilitate their work while executing practical projects in their organizations. This course is helpful for the professionals in their career growth and for the beginners to adopt it as career.

## Intended Learning Outcomes

1. To develop knowledge and hands-on skills in project management
2. To enable participants to prepare for the PMI BOK, preparing the participants to qualify the PMP exam
3. To align the project management knowledge of participants with project management work environment of different industries

## Objective

To course will develop the professional capabilities and provide certification in the field of Project Management so that the participant can manage and handle projects as well as act as Project Management Coordinator to handle project management matters effectively.

## Useful for

1. The course provides the broad spectrum foundation to professionals working in or desirous to work in the Project Management Departments of companies working in manufacturing, service, software, construction, government and education sectors, e.g. industries, banks, telecom, airline, utility service organizations, power plants, and Oil & Gas sectors, etc.
2. It starts with the core concepts and moves on to the advance topics, thus useful for both new entrants and experienced Quality Managers
