Certificate in Quality Assurance & Management Level I and II

Introduction

Quality Assurance & Management is one of the core elements of any business, manufacturing, government or service organization. It has attained a high level of maturity in the developed countries but still at low maturity level in under-developed and developing countries, including Pakistan. Quality Assurance is a broad based subject which deals with how to measure, control, standardize and continually improve the products and services of organizations through employees by effective standardization, improvement and enforcement of policies, strategies and processes. This course provides the foundation in understanding of core elements of the Quality Assurance for multi-discipline participants and professionals.

Learning Outcome

At the end of this certificate, participants will be able to

- Gain basic knowledge, understanding and application of developing Quality vision, strategies and KPIs for organizations
- Understand how to build and improve Quality Assurance and TQM programs in their organizations
- To develop the professional competence and skills in understanding the use of English language effectively both written and verbal in their activities.
- Understand and apply basic Statistical Process Control, Root Cause Analysis, Quality Circles and Improvement Teams.
- Attain sufficient motivation, encouragement and commitment to bring improvement and reforms in organizations with the help of Quality Management strategies, programs and tools.
