Introduction
Business ethics is a form of applied ethics. Business ethics deals with ethical rules and principles within a business or commercial context, the various moral or ethical problems that can arise in a business setting, and any special ethical duties or obligations that apply to persons who are engaged in commerce, including workers and managers, customers and suppliers, and the larger group of people who have some interest in the business.
Our interactive, engaging ethics training is designed to help employees to understand their critical role in maintaining company principles. Real-world scenarios challenge the learner to examine common behaviors and practices, and forecast unfortunate consequences. They ask employees to go beyond compliance – to look at the larger issues, while still keeping an eye on the bottom line.
